3 Three Reasons to Use Drug Deactivation Bags to Dispose of Unused Opioids:

- 1** 70% of prescribed opioids go unused and are left over in medicine cabinets, leaving them at risk for falling into the hands of friends and family. Get rid of unneeded opioids as soon as possible.
- 2** Flushing pills has harmful effects on the environment. Keep opioids out of lakes, streams and rivers by using the drug deactivation bags to get rid of unused pills.
- 3** Deterra Drug Deactivation Bags are an easy and environmentally friendly solution to destroying unused opioids, within resident's homes. Simple, three-step instructions are found on every bag, along with the recommended capacity for each pouch.

**Help keep your community safe
and dispose of drugs properly!**

This product is provided by the Rx Abuse Leadership Initiative and distributed the League of Minnesota Cities.

Disclaimer: As a public service, the Rx Abuse Leadership Initiative (RALI) is supporting the distribution of this Deterra Drug Activation System to promote the removal from circulation of unwanted drugs, including opioids. Please carefully follow the instructions supplied by Deterra, including filling the pouch half-way with water and disposing of it in your normal trash. Please do not return the used pouch. This item is not intended for sale or resale. RALI is facilitating the supply of the Deterra Drug Activation System on an as-is basis and without warranty of any kind, express or implied, including any warranty of merchantability or fitness for any particular purpose. RALI expressly disclaims any and all representations and warranties, express or implied, in connection with the Deterra Drug Activation System.
